

Find Bus Routes in Dhaka with 6 Android Apps

December 21, 2023

Online Desk: Navigating public transportation routes in this crowded city of Dhaka poses a challenge. The labyrinth of bus transit lines confounds both commuters from the city and from outside. Amidst this urban maze, the advent of cutting-edge mobile applications to find public transport makes life a bit easier. Let's explore the useful mobile apps to find bus routes in Dhaka city.

6 Handy Mobile Apps to Locate Bus Routes in Dhaka

Bus Route: Dhaka City

It was launched on October 3, 2023. This app, developed by Puresoft Solutions, includes a comprehensive list of bus commute lines and integrates with Google Maps. The service was last updated on October 16.

This smart solution provides a user-friendly experience by allowing users to select their starting point and destination. Additionally, passengers can conveniently check stations near their current location. This feature enables catching a desired bus from any nearby location, even without knowing the station's names.

All station and bus movement information is directly accessible on Google Maps. The app offers language flexibility, allowing users to view content in both Bengali and English. Furthermore, users can change the interface's appearance to suit their preferences.

The digital service, identified as version 1.1.1, is compatible with Android 5 and above. Over the last two months, it has garnered more than 5,000 downloads and earned a commendable 4.4-star rating from 54 reviews. This 11 MB Android application can be downloaded from the Google Play Store.

Dhaka City Bus Route

Launched on April 18, 2017, this mobile app, with a modest size of 4.2 MB, is a creation of 71 Lab. It stands out for its exceptional user-friendly search feature, allowing users the freedom to explore various routes without any limitations.

Beyond its primary function, the app enhances user experience by providing additional features such as directions to Dhaka's notable points of interest, crucial contact numbers for emergency services, and legal assistance.

The mobile software's journey continues with its latest version, designated as version 15, which received an update on November 28, 2023. Offering compatibility with Android 4.4 and higher operating systems, the app has garnered significant attention. With a remarkable 50,000-plus downloads, it has earned a commendable 3.7-star rating given by a diverse user base of 270 reviews so far.

Dhaka Bus Route

Developed by Coderco, this Android app was launched on August 24, 2023. With a size of 5.8 MB, this app has quickly become a reliable database, encompassing not only local buses but also providing information on seating and counter buses. This app helps to locate the public transport service in Dhaka.

The app's journey through versions continues, with the current version standing at 2.2, a steadfast continuation since the last update on November 27, 2023. With a download count exceeding 1,000, the digital solution has garnered a favorable 4.3-star rating evaluated by a user community of 36 reviews.

To run this app, users need an Android 7.0 and above operating system on their phones.

Dhaka City Bus Routes

This app by Ncosync has a download size of 14 MB. Launched on May 26, 2023, this app offers an expansive database, featuring over 156 buses and more than 287 route lists. This app's standout features include an effective search function and visuals of buses, providing users with a unique and comprehensive experience.

Updated on August 26, 2023, the app, currently at version 11.0.0, has seen its downloads surpass 1,000 since its launch. Compatible with Android 5 and above, it has earned a respectable 3.5-star rating from 15 reviews.

BD Bus Route

With a download size of 6.1 MB, this app was released on November 14, 2021. Developed by the NewAgeDevs, this Android app allows users to view the routes of over 150 buses with ease. Its user-friendly interface has contributed to its impressive download count, exceeding 10,000. Featuring images of the vehicles, this app caters even to newcomers, providing a visual understanding of the various buses traversing the streets of Dhaka city.

Having achieved a 3.6-star rating from 27 reviewers, the Android app was last updated on November 6, 2023, reaching version 1.1.2. Compatibility requires at least Android 5 for uninterrupted functionality.

Kon Bus Kothay Jay (Dhaka City)

Also known as Bus Route Info (Dhaka City), this 6.2 MB app by Global Digital Apps made its debut on the Google Play Store on November 25, 2021. The mobile software provides individual roadmaps for each bus company, offering users a comprehensive view of the diverse routes available.

One of its notable features is the ability to show fares based on rates set by the national transport authority. This is made possible through a direct link to another digital service, 'Vara Koto? Bus Vara Talika,' also offered by Global Digital Apps.

With a 3.6-star rating from 28 reviewers, the Android app has been downloaded more than 5,000 times. The current version, 2.2, was updated on August 14, 2023, requiring a minimum Android 5 operating system for smooth operation.

Verdict

So far, we have discussed 6 Android apps to find bus routes in Dhaka city. All of these mobile apps focus on the feature of information on bus traffic across the city. However, 71 Lab's veteran solution has secured its position in the market due to maintaining a consistent update. NewAgeDevs and Global Digital Apps lead in terms of the highest number of downloads in the shortest period. Not having been updated very recently could pose a significant drawback for Global Digital Apps' app, as well as Ncosync's.

Finally, if user preferences are considered, the apps developed by Coderco and Puresoft Solutions have great potential.
