

Bangladesh reports zero dengue death in 24hrs

December 21, 2023

Online Desk: Bangladesh reported zero dengue death in last 24 hours till Thursday morning.

According to data from the Directorate General of Health Services (DGHS), some 177 dengue patients were hospitalised during the period.

The death toll from this mosquito-borne disease now stayed to 1,692 this year, it added.

According to DGHS data, 1,246 dengue patients were undergoing treatment at different hospitals across the country.

The DGHS said nearly 3,20,055 have been infected and some 3,17,117 patients have, so far, been released from hospitals across the country this year.
