

Canada to keep supplying potassium fertiliser: Razzaque

February 9, 2023

Online Desk: The minister said this at a press briefing after a meeting with the delegation of Canadian Commercial Corporation (CCC) led by Canadian High Commissioner Lilly Nicholls, at the secretariat in Dhaka. Razzaque said there was extreme global uncertainty about potassium fertilisers last year due to the Russia-Ukraine war.

“We failed to buy potassium fertilizer from Belarus. At that time, Canada provided us with 5 lakh tonnes of potassium fertiliser on an emergency basis. As a result, there was no shortage of fertiliser in the Rabi season and the ongoing Boro season.” The CCC delegation is currently visiting here to increase trade relations and facilitate trade with Bangladesh.
