

Bangladeshi Individual Artist Taqi Tahmid Set to Release 5-Track EP “SATURN” Worldwide on June 10

May 18, 2026

Online Desk : Bangladeshi individual artist Taqi Tahmid is set to release his highly anticipated seventh EP, “SATURN,” worldwide on June 10, marking what may be his most personal and emotionally intense project to date. The 5-track EP presents a deeply introspective journey through one of the most difficult and transformative chapters of Tahmid’s life. Known for his raw storytelling and emotionally immersive sound, Taqi Tahmid uses SATURN as a reflection of his current emotional reality — a project built from pain, confusion, darkness, and eventual self-reclamation.

The EP explores a complicated phase in Tahmid’s life that began with his involvement in a deeply personal situation that blurred the lines between emotional attachment and romance. What initially felt meaningful soon evolved into emotional uncertainty, ultimately pulling him into darker spaces mentally and emotionally.

Across its five tracks, SATURN captures the aftermath of heartbreak, depression, stress, inner conflict, and the emotional wreckage that followed. It paints an unfiltered picture of an artist confronting the collapse of his inner world while struggling with self-destruction and isolation. Yet SATURN is far more than a project about pain.

At its heart, the EP tells the story of gradual recovery — the difficult process of pulling oneself out of emotional chaos and slowly rebuilding life piece by piece. It reflects Tahmid’s evolution into what he describes as an anti-hero: imperfect, scarred by experience, yet determined to rise above his past and make things right. Speaking about the release, Taqi Tahmid describes SATURN as his most vulnerable and honest body of work to date.

“This EP reflects where I am in life right now. It’s about losing yourself in something you thought was real, breaking because of it, and then choosing to rebuild — not as the same person, but as someone stronger, even if flawed.” As his seventh EP, SATURN marks a defining moment in Taqi Tahmid’s artistic evolution, showcasing his willingness to transform personal pain into art that resonates on a universal level.

“SATURN” will be available worldwide on all major streaming platforms on June 10.
