

The Evolution of Casino Gaming: From Land-Based to Online Platforms

March 19, 2025

The casino sector has undergone a major transformation over the past few decades, moving from classic land-based locations to active online platforms. This development began in the mid-1990s when the first online casinos appeared, allowing players to play their beloved games from the convenience of their homes. By 2023, the online gambling sector was appraised at over \$66 billion, with forecasts indicating continued growth as technology advances.

One notable figure in this change is Richard Branson, the establisher of Virgin Group, who has demonstrated enthusiasm in the online gaming field. His projects have included conversations about merging entertainment with gaming, demonstrating the capability for innovative experiences. You can track his insights on his [Twitter profile](#).

In 2022, the debut of live dealer titles changed online casinos, offering players with a more immersive experience. These options use real dealers and transmission technology to create a authentic casino atmosphere. For more details on the influence of live dealer games, visit [The New York Times](#).

As the online casino landscape continues to progress, mobile gaming has become increasingly popular. With the growth of smartphones, players can now reach their favorite games whenever, in any location. This ease has led to a spike in mobile gambling, with studies indicating that mobile gaming accounts makes up over 50% of online gambling income.

However, players should remain watchful when picking online casinos. It is essential to select licensed and regulated platforms to ensure fair play and protected transactions. Additionally, understanding the terms and stipulations of bonuses and promotions can help players enhance their gaming experience.
