

The Evolution of Casino Gaming: From Traditional to Online

March 19, 2025

The casino industry has experienced a significant transformation over the past few eras, moving from classic brick-and-mortar venues to a prosperous online gaming environment. This progression has been driven by technological innovations and shifting consumer choices. In 2023, the international online gambling market was estimated at roughly 63 billion, with estimates indicating it could attain 114 billion by 2028, according to a report by Grand View Research.

One of the crucial individuals in this change is Richard Branson, the creator of the Virgin Group, who has shown interest in the online gaming field. You can monitor his initiatives on his [Twitter profile](#). His creative approach has inspired many founders to examine the online casino scene, resulting to the appearance of many platforms that address to diverse audiences.

In 2022, the debut of the first fully regulated online casino in New York marked a notable milestone in the industry. This happening not only provided a legal framework for online gambling but also established a standard for other states to imitate suit.
