

The Evolution of Casino Gaming: From Traditional to Digital

May 6, 2025

The casino industry has experienced a notable transformation over the past few eras, progressing from conventional brick-and-mortar locations to sophisticated online platforms. This transition has been driven by technological advancements and shifting consumer preferences. In 2023, the global online gambling market was estimated at roughly 63 billion, with forecasts indicating it could hit 114 billion by 2028, according to a report by Grand View Research.

One of the trailblazers in the online casino space is Microgaming, which launched its first online casino platform in 1994. This innovation marked the start of a new phase in gaming, allowing players to enjoy their favorite games from the comfort of their homes.
